1. Summary

This document describes the MDVita EHR Real World Test (RWT) results obtained by executing the CY 2022 Real World Testing Plan for MDVita.

On Monday October 17th, 2022 MDVita IT selected a list of health care providers that are users of the MDVita EHR and representative of the MDVita client population. The IT performed the test cases of the RWT plan in their production setting.

The MDVita RWT plan consists of 14 measures. 11 measures are automatically calculated by MDVita in the qualified period and 3 measures as answered by the users in a survey.

Base metrics used for the execution of the test plan:

- Care Setting: Ambulatory
- Qualified Period: April 1st, 2022 – September 30th, 2022
- Total health care provider clients tested: 14
- Client identifiers: A, B, C, D, E, F, G, H, I, J, K, L, M, N

For preserving the privacy of the clients we are using letters to identify each client. An internal IT document identifies each letter to a client.

Email: support@hc2000inc.com

RWT Measure #12. What are the number of different HISPs/HIEs/HINs you connect to from your EHR?

Three clients (C, I, L) surveyed, their answer is 1 HISP. MDVita integrates with a single third party for DIRECT exchange. MDVita HISP of choice is EMR Direct

http://www.hc2000inc.com/Pages/MDVita_API_Interoperability.htm

Health Care 2000, Inc

Measures

Preferred ▾	CMS ID ▾	NQF ID ▾	Measure Name ▾	Description ▾	
☒	CMS56v10		Functional Status Assessment for Total Hip Replacement	Percentage of patients 18 years of age and older who received an elective primary total hip arthroplasty (THA) and completed a functional status assessment within 90 days prior to the surgery and in the 270-365 days after the surgery	2C928085-75A
☒	CMS122v10		Diabetes: Hemoglobin A1c (HbA1c) Poor Control (> 9%)	Percentage of patients 18-75 years of age with diabetes who had hemoglobin A1c > 9.0% during the measurement period	2C928082-74C
☒	CMS165v10		Controlling High Blood Pressure	Percentage of patients 18-85 years of age who had a diagnosis of essential hypertension starting before and continuing into, or starting during the first six months of the measurement period, and whose most recent blood pressure was adequately controlled (<140/90mmHg) during the measurement period	2C928082-7505
☒	CMS156v10		Use of High-Risk Medications in Older Adults	Percentage of patients 65 years of age and older who were ordered at least two high-risk medications from the same drug class. Three rates are reported. 1. Percentage of patients 65 years of age and older who were ordered at least two high-risk medications from the same drug class. 2. Percentage of patients 65 years of age and older who were ordered at least two high-risk medications from the same drug class, except for appropriate diagnoses. 3. Total rate (the sum of the two numerators divided by the denominator, deduplicating for patients in both numerators).	2C928082-7871
☒	CMS68v11		Documentation of Current Medications in the Medical Record	Percentage of visits for patients aged 18 years and older for which the eligible professional or eligible clinician attests to documenting a list of current medications using all immediate resources available on the date of the encounter	2C928084-7545
☒	CMS127v10		Pneumococcal Vaccination Status for Older Adults	Percentage of patients 66 years of age and older who have ever received a pneumococcal vaccine	2C928082-7505
☒	CMS22v10		Preventive Care and Screening: Screening for High Blood Pressure and Follow-Up Documented	Percentage of patient visits for patients aged 18 years and older seen during the measurement period who were screened for high blood pressure AND a recommended follow-up plan is documented, as indicated, if blood pressure is elevated or hypertensive	2C928084-7748

RWT Measure #14. How many different syndromic registries do you connect with?

Three clients surveyed and their answer is none. Clients claimed electronics' Florida syndromic registry exception. The state of Florida accepts electronic syndromic data only from emergency rooms and hospital settings. MDVita is used and certified for Ambulatory care setting.

Exception Letter:
