REAL WORLD TEST RESULTS

Product: MDVita EHR version 27

Qualified Period: January 1st, 2025 – December 31st, 2025

ONC-ACB-Certification ID: 15.04.04.2904.MDVi.27.02.1.221020

Last Date Updated: 01/19/2026

1. Summary

This document describes the MDVita EHR Real World Test (RWT) results obtained by executing the CY 2025 Real World Testing Plan for MDVita for the 2025 qualifying period. Results in this report are for the criteria in 45 CFR 170.315(g)(7), (9), and (10)

On Friday, January 16th, 2026, MDVita IT selected a list of health care providers that are users of the MDVita EHR and representative of the MDVita client population. IT performed the test cases of the RWT plan in their production setting.

The MDVita RWT plan consists of 15 measures. 12 measures are automatically calculated by MDVita in the qualified period. This report will list only results applicable for the criteria in 45 CFR 170.315(g)(7), (9), and (10)

Base metrics used for the execution of the test plan:

- Care Setting: Ambulatory
- Qualified Period: January 1st, 2025 – December 31st, 2025
- Total health care provider clients tested: 5
- Client identifiers: De-identified

For preserving the privacy of the clients, we are using letters to identify each client. An internal IT document identifies each letter to a client.

2. MDVita relied upon software by certified criteria used during real world testing procedures

Certified criteria	Criteria Name	MDVita relied upon software
315(c)(2)-(3)	Clinical Quality Measures Import, Calculate, and Report	PopHealth (Version 6.0)
315(g)(9)	Application Access.	EMR Direct Interoperability (Version 2017)
315(g)(10)	Standardized API for Patient and Population Services	EMR Direct Interoperability (Version 2021)
315(h)(1)	Direct Project	EMR Direct phiMail Server

3. Real World Test Results by Measure

RWT Measure #8. Number of API Queries Made with Data Element Results Successfully Returned

Associated Criteria: 315(g)(10)

The criteria is not widely used by our customer base. We extracted test data information of the measure from our QA-sandbox environment (HC2K-Test). Two working modes were tested: Standalone-launch for a single patient, and EHR-launch (Population Services).

Test results. Performed during the qualified period

HC2K-Test sandbox

Real World Testing Results				
Parameters	RWT Test 01/01/2025 - 12/31/2025			
	RWT Measure Nbr.	Measure Description	Associated Criteria	Counter Description
	8	Number of API Queries Made with Data Element Results Successfully Returned	315(g)(7)-(g)(10)	Number of API Queries With Data Element Returned

Client B Utilization in 2025

Real World Testing Results				
Parameters	RWT Test 01/01/2025 - 12/31/2025			
	RWT Measure Nbr.	Measure Description	Associated Criteria	Counter Description
	8	Number of API Queries Made with Data Element Results Successfully Returned	315(g)(7)-(g)(10)	Number of API Queries With Data Element Returned
